#### BRITISH LABOR LEADER IS UNIQUE CHARACTER

LONDON, May 30. (Correspondence of the Associated Press.)—Every parliament produces a new character. The American congress had its "Sociates" Jerry Simpson from Kansas and the house of commons had Kier Hardie, who appeared on the floor in a workingman; cap and with a workingman; a cap and with a workingman; a cap and with a workingman; a freedom of speech in the era when the slik hat and frock stoat were still almost a uniform for that assembly, and when the heavy Gladstonian manner was its model for debate. Joint Jones, the new labor member from Silvertown, is the Jerry Simpson and the, Kier Hardie of the new house of commons.

The proof of this is that his speeches are punctuated with shocked cries of "order" from the oldtimers, and the reason for the cries is that he talks to the house of commons just as he used to talk when he was addressing outdoor audiences from a soap box at Tower Hill, which is the forum for informal workmen's debates.

"Don't try to assume so much, gu'nor!" was his first ramark to the speaker. Speaker Lowthar, sitting under a canopy, arrayed in his wig and gown, is a personne certainly no less portentous than the chief justice of the United States of America, and the house had a shock equal to what the supreme court would have suffered under similar less majeste.

John Jones got even with the house last night.

"I want you gentlemen to know," he

last night.
"I want you gentlemen to know," he remarked while discussing conscription. ("Honerable members" is the hallowed term for referring to members of the house.) There were louds calls for "order!" Mr. Jones replied:
"I beg your pardon if I have made a mistake by calling you gentlemen."
The house saw the joke and cheered him.

## Don't "Follow the Leader"

The "Leader" is an ancient artifice employed by the so-called "economy stores" to create the impression that their prices are low. They sell an article of standard brand several cents cheaper than it can be bought elsewhereoftentimes cheaper than the dealer himself can

buy it.

Now, if these stores carried out this policy on ALL their goods they would be doing business at an actual loss. Why, then, do they make at an actual loss. Why, then, do they make at an actual loss. this sacrifice on some standard article? Be-cause they expect to get it back with good in-terest on other and UNIDENTIFIED goods which the uninitiated think they are getting cheap because the "leader" was cheap.

Real economy is in dealing where you have abso-tic confidence in the grocer. We are in a position to serve you intelligently. We take it our business to test everything we recom-

When RYZON was introduced we knew that it was the product of the General Chemical Company, a great Chemical Organization, and must be worth trying. We did, and now we know why they call it "The Perfect Baking Powder."

We consider the RYZON Baking Book of untold value. It was the first baking powder manual to introduce level measurements. That's one reason why we never have any complaints from RYZON—women can't help but use it accurately and they have uniformly better baking.
